## Queenstown Baseball Club to Enter the Provincial Play-off

After a very successful baseball season the Queenstown Baseball Club has decided to enter the Provincial Intermediate play-off and probably the Junior play-off. The series will be completed by Aug. 2nd, so watch for posters for dates of games in the very near future.

On Sunday, July 19, the Queenstown team were hosts to the Champion Club, considered to be the strongest in this section of the country. The afternoon game, of a double-header, saw Queenstown come out on the long end of a 8-4 score. Credit on the mound for Queenstown turned in a creditable performance, allowing only five scattered hits, Latif and Walker, Champion hurlers, had difficulty in keeping the Queenstown boys from hitting often.

The evening game was close and exciting throughout, and after an exciting ninth inning, Champion emerged victorious 5-3. In this inning one run was scored, and the tying runs were on base, but were unable to advance. Robinson pitched for Champion and Mitchell and Rubbelke for Queenstown.

## BUFFALO HILL NOTES

Mr. and Mrs. James Wyatt and son and Mr. J. R. Wyatt are spending a few days at Banff with Lomond friends.

Mr. and Mrs. Walter Steiner left last Saturday on a camping holiday at Banff. They were accompanied by Doris and Agnes McInelly.

A hailstorm passed through this district about 6 p.m. last Saturday, July 18th, leaving heavy damage in its wake. Some of the local farmers to receive damage in varying degrees were: A. H. Tharle, Robt. Beacom, E. Campbell, Harry Burgess, W. G. Parish, Roscoe Shatto, total loss; J. R. Wyatt (one of the best fields in the district), total loss; Jas. A. Douglas, partial loss; B. Burns and Dave Munsey, total loss. Others in the path of the storm suffering partial loss were M. P. Marshall, Messrs. Broderick, Ryan, and others. The storm started somewhere west of the Carleton Place and moved eastward, continuing to Armada. Mr. Shatto reported 18 chickens and one goose killed by hail and found whole broods of young partridges as well as the old birds lying dead. Mr. Walter Steiner's freshly plowed summer fallow was noticed with hail four hours after the storm. The hailstones were as large as hen eggs in some places.

## Sad Parting

Little bank roll ere my heart,  
Let me press you to my part,  
All the year 'I've worked for you  
I've been faithful you've been true.  
Little bank roll, in a day  
You and I go away  
To find some joy and festive spot;  
I'll return—but you will not.

## The River Hill is Being Gravelled

The graveling of the river hill was commenced on Monday morning, under the new road plan of the Alberta Government. This work is being paid for with Prosperity Certificates. There are about twenty-four men employed, two teams and four trucks. It is anticipated that with the first allotment a point above the flume, also a stretch north and south of the railway track which has been in poor shape for some time, will be completed.

It will be interesting to watch this experiment. It is up to every citizen to co-operate in helping to make the issue of these certificates a complete success, by keeping them in circulation in the district as long as possible. The local business men have declared themselves by stating that they will take this new money so there will be no difficulty from this source. If everyone will get behind this movement and give it the support it deserves, we should be in line for a larger grant from the next allotment.

## Girls' Softball

On Tuesday evening the Mossleigh girls' softball team visited Arrowwood and played the local girls. Score, Arrowwood 20, Mossleigh 10. On the same two teams met at the Social Credit picnic held at Carleton Place, when the Arrowwood girls again came out victorious, Score, 14-7.

Mr. and Mrs. J. S. Culp and Mr. and Mrs. Lawrence Larsen returned this morning from a motor trip in the States. While there they attended the annual conference of the Church of the Brethren at Hershey, Penn., as well as visited with relatives in various States.

## The Marketing of Canada's Wheat

Many serious students of Canadian affairs consider that the maintenance of a reasonable standard of living for farmers and, indeed, for all in Western Canada, will require the production of an annual average of about 400 million bushels of wheat, which in turn will necessitate an annual export of about 280 millions.

Since 1920, the export sales of Canadian wheat have gradually dwindled from an average of over 300 million bushels a year to an amount last year (1935) of only 165 million bushels. These decreased sales represent lost markets.

To increase export sales from 165 million bushels annually, to at least 280 million, would appear to be a vital necessity for the welfare of Western Canada. How to regain these lost markets is one of the two major problems with which Western people are confronted—the other being the low purchasing power of wheat.

A serious consideration of methods that might be adopted in order to increase the sales of Canadian wheat must involve an accurate knowledge of which markets have been lost, and of the causes that have brought about the decline in sales.

Prior to 1923, Canadian wheat and flour was sold each year on the markets in over seventy countries in the world, and is probably correct to state that over 300 million people, outside of Canada, in those areas where it was improved because it contained some percentage of Canadian wheat.

Today many of those countries use no Canadian wheat at all, and all of them use less Canadian wheat than they did, some losing substantially less.

Taken as a whole the statistics reveal that between 1923 and 1929 the world, exclusive of China and Russia, used 10.6% on the average, of Canadian wheat in its mix of flour and bread, whereas, during the period from 1929 to 1934, the average used was only 7.4%. Examined from another angle the situation can be expressed as follows: Between 1929 and 1935, the world international trade in wheat has suffered a decline of 31%, but Canada's world trade in wheat has suffered a decline of no less than 46%.

In future articles, an attempt will be made to set out the details of the most important foreign markets in which Canada, prior to 1929, sold wheat and flour, to show the present sales to these markets, and so to appraise the extent of the decline that has occurred in the sales of Canadian wheat to each country separately. Then, perhaps, an attempt can be made to discuss some of the factors that have brought about the decline in sales, both of world export wheat in general, and of Canadian wheat in particular, in these various countries.

A clear appreciation of just what has occurred, in as much detail as can be obtained, should afford some foundation for suggestions to be made, it is hoped, to win back some, if not all, of the markets for Canadian wheat and flour that have been lost during the past few years.—Searle Grain Co. Ltd.

## Brethren Church Notes

The District Conference has just closed. It was a very interesting and inspiring meeting. There were in attendance a number from different parts of the Province, also some from Saskatchewan. The Rev. John Wiesend, who has served as Pastor of the church and Field Superintendent of the District for three years but lately gone to North Dakota, returned for the Conference.

Rev. J. W. Lear, Dean of Bethany Biblical Seminary, Ill., also attended the Conference and will remain about two weeks in Western Canada, holding some preaching services in a number of our Churches.

The Young People's Camp, which was held on the Indian Reserve just prior to the Conference, was well attended. The Camp Leaders, Rev. Paul L. Longnecker and wife, and Miss Ida Shockley, from Washington state, remained for the Conference. They were very capable people and their services were appreciated very much.

Rev. Mr. Wiesend returned to North Dakota on Friday night. We feel that he did a great work while in Canada and especially along the line of Bible teaching. A number of our young people have become very much interested in the study of the Bible and we believe the good work Rev. and Mrs. Wiesend started will continue on in years to come. The Conference decided that the Bible School will be continued.

Our best wishes go with the Wiesends as they labor in revival meetings in North Dakota, Ohio and Illinois. In Southern Illinois, they will again take up a pastorate in connection with field work similar to that which was done here.—A Worker.

## School Children's Library

The children's School Library has been removed to the home of J. M. Weiss for the months of July and August. Miss Loretta Weiss will act as Librarian, and children desiring books will be able to obtain same any afternoon or evening. Please return books, taken previously, as soon as possible.

## Arrowwood Social Credit Group Will Meet Semi-monthly

A meeting of the Arrowwood Social Credit Group was held in the Locke building on Tuesday, July 21st, with the President, L. H. Irwin, in the chair. Minutes of the meeting of June 25th, 1936 were read and on motion by E. Lewendon, seconded by Mrs. Coleman, were adopted as read.

A letter was read from R. E. Ansley, Secretary of the League, was read regarding the re-organization of the Group.

Moved by R. Moir, seconded by E. Lewendon, that we meet on the first and third Wednesday of each month at 8 p.m.

A discussion followed concerning the hiring of a road worker under the present plan and was explained to the satisfaction of the meeting generally.

Moved by Glen House, seconded by J. Hesketh, that we write to M.R.A. asking for funds to carry on the work, as the present allotment is not nearly sufficient. The President and Secretary to word the wire to Peter Dawson, M.L.A.

On a motion by R. Archambault, seconded by E. Lewendon, the Secretary was instructed to write for dozen more copies of the Constitution and By-laws of the Social Credit League.

The Secretary was also ordered to send a letter to our Premier, assuring him of our continued support and encouragement in his work for the betterment of the lot of the people of this Province.

The date of the next meeting was set for Wed. Aug. 6th, at 8 p.m.

Twenty-nine members, some new ones among them, paid up their dues at this meeting. The membership fee is 50c and those wishing to join can do so by sending the Secretary and paying their dues. This is important as only bona-fide members will be able to take an active part in the election of officers and other business coming up at the next meeting.

## Card of Thanks

We wish to thank, so very kindly, the many friends for their kindness and sympathy during our recent sad bereavement. The kind deeds and sympathy was very much appreciated by Mrs. Troy and family.

## Watkin's Fly Spray

Buy your season's Fly Spray requirements now so you will have Fly Spray on hand in time to control the fly pest before the flies start breeding by the million.

CUSTOMERS AGREE WATKINS FLY SPRAY IS BEST BECAUSE

(1) It actually kills flies, (2) it repels flies, (3) it is clean, does not gum, (4) sweet-smelling, will not taint milk or other products, (5) economical to use.

## IMPARTIAL AS LIGHT

YOU cannot argue with light. It just shows you things as they are. It plays no favorites. It gives brightness to the things that are already beautiful and it floods revealingly into the dark corners to show the dust and the grime and the hidden ugliness. If you guess at the nature and quality of things that are only half seen, if you see things that are not there, your eyes and your imagination are to blame. You cannot blame the light. For it can only illumine the aspects that are turned towards it.

NEWS is like light. It sheds a beam on men and events. It lifts the darkness from promotions and policies. It penetrates to hidden things and shows the truth as it is, for all to see.

THE news columns of a good newspaper are impartial. They tell the truth as it is found, they give all the facts that are known. The same news that guides its editorial opinions is there in full to inform your own judgments. It is the chiefest function of a reputable newspaper to bring everything of importance to the people into the daylight of publicity, discouraging vice and corruption and chicanery.

The independent newspapers of Southern Alberta shed the light of truth on the happenings and developments that interest you. Read them, confident in their integrity.

### Loans For Agriculture

Appropriate was the warning issued recently to investment companies and investors by P. S. Groch, K.C., chairman of the Local Government Board of Saskatchewan, when he told the Investors' Dealers Association of Canada in session at Jasper, Alberta, that they could not expect to be collectors alone, but must be prepared to continue to loan money.

At the same time, according to press reports of the convention, Mr. Groch told the board dealers that they "must be quick to offer concessions and help in debt adjustment if investors are to retain their status and the protection they now have."

It is generally well known that many of the loan companies, if not all of them, have shut down on loans in the prairie provinces and particularly in this attitude applicable to loans to farmers. Where the security is ample and prospects of repayment on maturing dates exceptionally good the mortgage companies are accepting a limited number of "risk" in the cities, but little if any loan money is available to western farmers just now, no matter what their record, how good the security they have to offer or how excellent the character of the prospective borrower.

Thus the farmer and the agricultural industry generally in the west is in somewhat parlous condition when it comes to securing credit that may be needed improvements or to carry on operations. It is true that there are governmental boards in existence for the purpose of making agricultural loans but these institutions have either no money available or such a small amount in comparison with the needs of the day that they are obliged to restrict their activities to a few select loans.

In the very few instances where mortgage corporations are prepared to advance money they are still insisting on a return of seven per cent for their investment and this is a higher rate of interest than borrowers can afford to pay in the light of income from ordinary revenue sources.

It is admitted, of course, that there are two sides to this story as with most stories. Loan company managers say that as custodians of private funds they cannot afford to loan money in the prairie provinces at the present time and particularly they cannot afford to run the risks of making loans to agriculturists. They point to the past few years of combined general economic and agricultural depression, the latter resulting from drought, surplus stocks of wheat and low prices for agricultural produce as an excellent reason why they should keep their purse strings tightly drawn when the farmer asks for a loan.

But more particularly do they inveigh against what they regard as repulsive legislation enacted by the several provincial governments as a potent reason for withholding credit from the farmers, legislation which has been placed on the statute books in the belief of the sponsors that they are protecting debtors at a time when they knew not which way to turn to escape from almost intolerable burdens.

Possibly the loan companies themselves are not altogether without blame for this class of legislation in at least some instances, if Mr. Groch's diagnosis of the cause is correct, for he is reported to have said that his belief that "one of the chief reasons for placing upon the statute books legislation which limits the rights of loan companies is to be found in the fact that some companies have adopted an attitude of drift and desire to wait until something turns up, with the result that the debtor gets in touch with a member of the legislature and demands all sorts of drastic legislation against loan companies."

One cannot get away from the fact that in the past four or five years, because of depression, conditions and lack of credit, farm property has perforce been allowed to run down at heels, due to the impossibility of repairing or replacing worn out equipment in anything like the degree necessary to continue to operate on an economic scale or to provide new implements to meet changed methods necessitated by changing conditions.

Almost every farmer knows by experience that this is the case and if he is unable to secure the necessary credit to enable him to repair and renew out tools of his trade and to purchase new equipment necessary for economic operation, the day when he is going to be able to pay his past indebtedness is further deferred and the loan company and the farmer alike suffer as a result.

Since the entire western country is still largely dependent upon agriculture for its future as well as its present welfare, it would appear to be good business for the loan companies to offer concessions in the matter of debt adjustment to a feasible limit and continue to loan money at a reasonable rate for agricultural purposes where the security is satisfactory. Such a course would appear to be in their own interests, in the interests of the clients whom they represent, in the interests of the farmers and in the interests of the country to do so.

#### Paid While It Lasted

"Washing" cancelled out the stamp, worth from \$1 to \$20 apiece, and selling them again at full value to unsuspecting commercial houses, was a racket uncovered by Secret Service men in Boston. Stamp-collectors sold the stamps to the "washers," who then sold them to the Government out of \$500,000 on stamps used for deeds and stock transfers.

The early Indians of North America made bread from the shells of clams, fresh-water mussels, and shadons, and used the beads as a medium of exchange. It was called "wampum."

### Park System In B.C.

Acres Of Show Gardens Being Planned For Province

Six million acres of show gardens are being planned for British Columbia. The provincial and federal governments are putting their legislative heads together to push immediate development of scenic parks in the coastal province. Some are already well finished; others still a pencilled outline on the map.

Over \$2,000,000 expected to go into public works this season, a sizeable lump will be used in grooming parks and building roads to make them easily accessible. The province, however, would hand over to the Dominion parks on which development has already started and concentrate upon new ventures, including the 3,000,000-acre tract named for Canada's governor-general.

At present the province looks after five of its parks and has mapped out four more for development. The Dominion has four more, completing a system that provides six acres of parkland for every inhabitant of British Columbia and more than half an acre for every person in the Dominion.

The 973 square miles of Garibaldi Park will be brought closer to truck highways with completion of a \$6,000,000 suspension bridge spanning Burrard Inlet and joining Vancouver with its northern suburbs. Preliminary work on the giant bridge already has begun.

Up until now Garibaldi Park, cradled in the coast range, has been inaccessible to motorists. Game warden in the timber reaches, in the Alpine lakes and on the slopes of one of the volcanic mountains that rises to a height of 9,000 feet. The province is keeping Twendim Park for its own. This, a vast garden that covers 3,000,000 acres of forests, mountains, lakes and streams, is the largest of all. At present the trails are threatened only by trails. Development of roads will be considered under a public works plan carried out by provincial and federal governments.

### Maple Syrup Crop

Quebec Produced Largest Quantity This Year Since 1929

One of the French-Canadian province's foremost industries, the maple crop, this year reached the bumper proportions of 1,581,000 gallons of syrup and 5,747,900 pounds of sugar, a major portion of which was shipped to the United States. The largest crop since 1929, this maple sap produced a revenue of \$2,267,300, as against \$1,911,000 in 1934.

More than 40 per cent of Quebec's maple sugar crop is annually bought by cigarette manufacturers in the United States and Japan. Many French chemists are said to be experimenting on the possibility of using maple sap in the production of alcohol.

### Requof Cheese

More Than 26,000,000 Pounds Are Manufactured Annually

More than 26,000,000 pounds of Requof cheese are manufactured annually in the picturesque French Alps. More than 11 centimes of this cheese has been manufactured on a commercial basis, but Requof cheese, itself, goes back even farther in history, as it is mentioned by Pliny the Elder, who wrote in the early decades of the Christian era. More than 200,000 persons, working on 25,000 farms, are employed and earn their living directly from the cheese industry. Milk is collected by 700,000 sheep, tended by 10,000 shepherds.

### Preferred More Dignity

Servants Of English Earl Did Not Like His Democracy

Many years ago we used to correspond with Aubrey Herbert, one of the fourth Earl of Carnarvon, who, although a vigorous opponent of socialism, was one of the most democratic of aristocrats. He was so democratic that he insisted on his servants sitting at table with him and his wife. He was also reported to have said that he was so democratic that he had at the end of a week they gave him notice that they were going to quit.—The Earl.

### Trying New Method

On the farms of Oxford county, Ontario, an experiment is in progress with a new method of preserving alfalfa. The crop is stored in the silo in green condition and treated with acid.

England has two of the fastest battle cruisers in the world, the Repulse and the Renown, each having a speed of more than 31.5 knots.

### Clever Men Beat Bank

Worked New System But Were Subsequently Caught

This stunt was revealed by an official of an important bank, victimized by the perpetrators, who since have been arrested. . . . Two partners, ostensibly operating a legitimate business, opened a checking account and deposited \$10,000. Within three months they had increased the fund to \$32,000, making the deposits in person, and getting to know the bank tellers. . . . One partner then appeared, asking to cash a partnership check in the sum of \$29,458.27. The teller recognized the signature, okayed it, and then—as is customary—used the teller-outpost to ascertain whether a sufficient balance was on hand.

Simultaneously, the other partner appeared, another teller's window, asking to cash a \$29,458.27 check. This teller also used the teller-outpost, and the official reports wrote in reply: "Okay, okay, I told you it's okay." . . . The loss was more than \$27,000.—New York Post.

### Eliminates Fire Hazard

Automatic Extinguisher For Airplanes

Fire is to be banished from aviation, according to British scientists who have been working for a long time on a blaze-prevention system for airplanes. Reports received in London say an automatic fire-extinguishing arrangement has been perfected which makes it almost impossible for a machine to catch fire, either in the air or after impact with the ground. Extinguishers are fixed in vital parts, on the gasoline tanks, with jets leading to the gasoline pipes, over the engines, in the fuselage, and in the landing gear. The extinguishers are automatic, and on the fuselage, they have spring-operated nozzles, which, when the pressure of the jets is set, extinguishing liquid is sprayed out before the fire starts and no flame can survive the action of this liquid.

### Hypnotic Suggestion

Lecturer Claims It Is Wonderful Help In Dentistry

Students of the Royal Dental Hospital in London have had their teeth cracked, chipped, filled and extracted, all without anaesthetics, and all without pain. It's done by hypnotic suggestion.

"There is nothing mysterious about it," claims William Leavelle, lecturing on "hypnotic dentistry" in several large London hospitals. "It is a perfectly natural process and in no way harmful."

"A suggestive patient—and 70 per cent are—has only to accept suggestions for anaesthesia and he can submit to the forceps or drill confident that he will feel nothing, either at the time or afterwards." Experience with 3,000 cases, he says, has convinced Mr. Leavelle that the possibilities for hypnotism in modern medicine are enormous.

### Lifted Tons Of Money

W. T. Dagger, of Blackpool, England, just retired from the Corporation service, has lifted over 300 tons of money in his 30 years of collecting from penny-in-the-slot, meters. His collection, he estimates, has averaged \$90 daily in coppers, or about \$75,000 in 30 years. As is in copper weighs just over five pounds his aggregate collection totals 302 tons.

### Snowshoes For Quilts

The Dionne quintuplets will be able to waddle around in the snow next winter without sinking if Mike Lyons, of Clayville, New York, has anything to say about it. He has constructed five pairs of snowshoes for the girls from Callander.

The hardest thing in making a speech is to know what to do with your hands.

**THE PERFECT GUM**

**AIDS DIGESTION**

### Using New Ceremony

Dominions To Have Special Part In King's Coronation

The British Dominions will have a special part in the crowning of the King, a cable to the New York Times from London said. It adds that following the coronation next May, King Edward VIII will make a tour of the Dominions.

"When Edward is crowned in Westminster Abbey on May 12, 1937," it says, "Canada, Australia, South Africa and New Zealand will receive positions in the ceremonies emphasizing their new importance as self-governing nations under the Statute of Westminster."

In accordance with this statute, the King becomes not only ruler of the British Empire as a whole, but separately and distinctly King of the Dominions. A new ceremony will be prepared stressing this conception of the King as the direct head of each Dominion. Through the Dominions Office conversations have reached an advanced stage regarding the exact part the Dominions will play. The crowning of the King in this new form will be the prelude to a royal tour of the Dominions."

### SELECTED RECIPES

#### ROLLED NUT WAFFERS

1/2 cup "Crown Brand" corn syrup  
1/2 cup butter  
1/2 cup sugar  
1 cup sugar  
1 cup chopped walnuts, or peanuts  
Heat the "Crown Brand" corn syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the sugar and the walnuts or peanuts, which has been mixed and sifted with the sugar. Now add the chopped nuts. Drop small portions from the spoon on a greased plate, and all without pain. It's done by hypnotic suggestion. When the cookies are done, they will be done. These cookies can be rolled or just left plain.

### Glider In Stratosphere

May Be Possible According To Tests Made In Moscow

Gilders may be able to reach the stratosphere ere long, according to reports from Moscow. By a new method a glider may be towed to great altitudes, the towing wire then paid out until the glider is 6,500 feet above the towing plane. If a second glider is towed by the first and its line paid out it can ascend above the first. Thus a plane flying below the stratosphere can, by this flying "chain" tow a glider miles above it. Gliding Master Venzlar has been making the tests.

### Faster Speaking

It is interesting to have the testimony of George Emery, who has written 150,000,000 words in shorthand to the fact that people speak much faster than they did; the average increase he estimates at something like 25 per cent. The coming of the motor-car has made a tremendous difference in the national rhythm. Even much of the music we hear is taken considerably faster than the composer intended.—London Observer.

Not until 1870 were milk cows known in Japan. An American cow was imported at that time and the men, selected for their strength, were assigned the task of wrestling the milk from her.

### Working On Anti-Fog Ray

Marconi Is Busy Trying To Perfect New Invention

Were Charles Darwin alive, he would not agree with the dissipation of the dank vapor which assails Great Britain mainly during cold weather, for the famous naturalist's delight of London was founded in a fog.

He glories in its "grandeur," as he said, and always looked forward to wintering in the metropolis, attracted by the prospect of a smoky mist. Although the origin of the species of town fog is the deadly smoke, hawking of ill health, the Victorians suffered these visitations with no hope of a "cure"; but today scientists are having promising results.

Recently there have been gnaty attempts to find the best method, and the outcome seems to be that future research will be centered around the use of planes would be necessary to remove a "cure"; but today scientists are having promising results. Already headway has been made, but the drawbacks at present are the cost and lack of facilities, for a huge amount of planes would be necessary to remove a "cure"; but today scientists are having promising results.

The most recent anti-fog developments promise to be the best of "war-ray" talk and the "mystery beam," which detects enemy ships and hostile aircraft. However, it is not the case that detects Marchese Marconi is perfecting a great anti-fog ray.

When, whether this ray will mature cannot be said; but it would appear that a definite fog-dispelling invention of wide application will be the result. It may be a ray, a powder, or chemicals. Everything depends upon the scientists.

### Forgotten Eskimo

Scientists Will Search For Traces Of Civilization In Eastern Arctic

Traces of a forgotten Eskimo civilization in the eastern Arctic will be sought by a Dominion government expedition, which will leave for the north on the Nasopce, sailing from Montreal.

It is the annual patrol to government posts in the north with the holds of the veteran Arctic ship bulging with mail and supplies. In a 10,000-mile cruise that will take the ship within 800 miles of the North Pole, contact will be made with 35 posts.

Included among the passengers was Douglas Leechman, an anthropologist from the National museum, who will spend several weeks on the Baffin islands, lying at the eastern tip of the Ungava peninsula.

In the far-eastern Arctic, tools of bone and ivory have been unearthed that bore no resemblance to those of the north. Scientists believe they indicate a peculiar Eskimo civilization now extinct, which Leechman will try to trace. He will probe old village sites on the islands in the hope of finding some clue to the date and character of the ancient culture.

By improved technique, surgeons report that it is now possible to cut and lengthen bones so as to extend a shortened leg as much as five inches.

No enemies to forgive? Then pardon a few friends.

**Para-Sani**

**HEAVY WAXED PAPER**

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile is not discharged in the bowels, gas builds up in the stomach, the liver becomes congested, and the world is a dull place.

A new liver movement does not always get at the cause. You need something that works. Carter's Little Liver Pills get at the cause. They break up the bile flow, they break up the liver, they break up the bowels, they break up the blood, they break up the system. And Carter's Little Liver Pills are the only liver pills that do this.

## Thou Shalt Not Love

— A NOVEL BY —  
GEORGIA GRAIG

CHAPTER I.—Continued

Starr had not realized that her tempestuous words had been spoken until the man's voice interrupted. It was a crisp, pleasant voice, with a lazy, amused drawl. She whirled around to face him, hands gripping her handbag tightly as the nearest support.

The man had detached himself from the careless crowd, and stood not far from her elbow, indolently leaning against a corner of the show window frame. He was looking down on her with quizzical gray eyes that held a glint of humor in their depths. For that first startled moment Starr's complete vision was filled with him. He was tall, handsome in a broad, broad-shouldered, slim-waisted way, with a physique that bespoke the owner's pride of its possession in its care. He wore dark smartly tailored clothes which were unerringly fitted in their category of good taste. Money, too, of course. That he was accustomed to that as to the air he breathed was in his slightly arrogant features, features which had just the proper tinge of hardness to give him an air of interesting magnetism.

The smile of tolerant—or was it condescending?—amusement curved his lips more widely as he looked straight into Starr's eyes, his gaze fixed on her face, from which the eagerness of her passionate plea had not fled.

"So you want to play, do you?" he repeated, with maddeningly slow emphasis.

Starr could not understand why on the instant she was not annoyed at his intrusion, or his very apparent jibing. Such a short time ago

the Starr-Ellison she had always known would have thought furiously. "Katharine!" and one look would have been a crushing rebuff to him. Today it did not matter. Nothing would be of so small account. Nothing mattered, anyway. Every thing was an affair of relative. Things were important only because of the bearing they had on your life. With barely six months to live, which could be considered practically no future at all, what did it matter what she might say or do? What anyone else she might say or do?

Even though she was surprised at herself, steadily Starr returned the contemplative scrutiny of the gray eyes that were amusingly regarding her. She placed him. Readily. The man before her represented that gay, smart world she had never known, for which she had yearned—the other half of the world which knew how to play. He had taken advantage of the opportunity. He stood for all she had lost in life, and could never hope to attain.

She cried out at him suddenly, her eyes blazing at him as though she were, through him, hurling her debt to earth and heaven.

"Yes, if you must have it! More than anything else in this wide world, I want to play!"

The smile in his eyes was taunting on his lips, as he drew her back, away, long lashes dropped over her confused eyes. What had she done? Unnoticed she backed into passersby. The gray-eyed man's hand went out to touch her arm.

"Wait a minute," he said. "We ought to talk this over a bit, hadn't we? There's no hurry..." His smile was friendly.

"The Arabs, you know, have a saying: 'What is there to hurry for? We are all going the same way. Why should we try to get there one another? Let us enjoy today, for today will never come again...' Of course this isn't Egypt, but—"

He stopped short at the look of blazing fury in the depths of the girl's dark, mysterious eyes. Her voice was a flame at him.

"I hate Egypt!"

Then she was gone, flying up the stairs, losing herself in the crowds, never looking back. Michael Fairbourne stood staring after her with the camera skin. "Still, I'm wondering a little."

### CHAPTER II.

There was no good reason for Starr Ellison to be on Fifth Avenue that cheerful early Autumn mid-day. Only that it was not Sixth Avenue. Nor was there along it any employment office, wordlessly insisting on her need for job hunting in the seclusion.

After her visit to the doctor, with whose smiling assistant she had, incidentally, felt the greater part of her small remaining store of cash for the privilege of being told that she had only six months more of life—such small and disastrous matters as searching for a job appeared of small moment. Especially when there were no jobs. Why keep on hunting for one by which the small merely keep the breath of life in her body for six months more? It hardly seemed worth while.

Such thoughts were in Starr's mind as she fled along the street after her tempestuously uttered rebellion against Fate in the atmosphere of the prosperous Avenue. Nevertheless, she mechanically turned at the next corner and saw the street made clamorous by the 21 overhead, and headed for the street which was her last hope. She had not already tried that day. She couldn't be a quitter entirely, she supposed, even if she had so short a time to fight. Work was most necessary at the moment. Vitally so, for she had a most distasteful memory of her season that morning with the keeper of her rooming house. A dreary, hopeless kind of place it was, but Mrs. Maloney who kept it, had made it quite plain to Miss Ellison that she had waited for her rent quite long enough, and that while she was right sorry that Miss Ellison couldn't get a job, there were plenty of other people in the same way. After all, Mrs. Maloney was not an elemosynary institution. In other words, Mrs. Maloney had conveyed to Starr that if she was prepared to pay her three weeks' arrears of rent that she could have her clothes. Otherwise—

None too pleasant a prospect, and it was beginning to look like a rough ride ahead for a girl who, at most, had in her purse only enough for lodging for a night or two some-

where—without baggage. Even if she were going to pass out in six months, in the meantime, she supposed, she would have to sleep somewhere.

A wry smile crossed Starr Ellison's lips as she rushed along. She—who didn't know where she was going to sleep that night, had been waiting her time on Fifth Avenue, rebelling against not having a taste of life. She had been wanting to play!

She didn't know that noon had come, and forgot that her breakfast had been a doughnut and a cup of coffee until she suddenly realized that the crowds who were jostling her, showing her, were making their way into the rows of eating places that sat cheek by jaw along the cross street. She stopped still before one of them, drawn irresistibly by the sight of the good things that eat temptingly displayed. Another show window?

She forgot that she was hurrying to look for a job, forgot she had wanted to play, forgot even for that minute what that doctor had told her, as her eyes widened at sight of the food, and then swept on further to the people at the tables. In her eyes was an expression of looking upon some amazingly absorbing scene, but it was no more upon which she gazed than the vista of food and warmth that spread out in one of those restaurants which not so long ago Starr Ellison would not have bothered to give a passing glance.

Two prosperous looking business girls were having their luncheon near the window—a substantial meal, with a steak that was simply oozing butter, gray peas and the crispest looking salad.

(To Be Continued)

### Like Canadian Kitchens

England Behind In That Respect

Kitchens of Canada and the United States had been a revelation to many countrywomen from across the seas. Mrs. Frank Keyes, of Wales, a delegate to the recent convention in Washington of the Associated Country Women of the World, commented as she passed through Montreal en route for her home.

Mrs. Graham said that in English kitchens pans and old vases were too prevalent while kitchen planning was still too much "an idea only." It is nonsense to say we have nothing to learn from others, she remarked.

Bamboo Tree Grown In B.C. Basil Keys, British Columbia horticulturist, is creating a tropical paradise. Seeking to prove that his theory that bamboo trees can grow in Canada, Keys completely surrounded his home with a half-acre varieties of the tropical trees. The trees were flourishing.

Every 10¢ Packet of WILSON'S FLY PADS

WILL KILL MORE FLIES THAN SEVERAL DOLLARS WORTH OF ANY OTHER FLY KILLER.

10¢ WHY PAY MORE

Best of all fly killers. Clean, quick, sure, cheap. Ask Your Drug, Grocer or General Store.

THE WILSON FLY PAD CO., HAMILTON, ONT.

"I wish I hadn't bought that CHEAP MUSTARD!"

"I am surprised at you. You know KEEN'S is the best."

"Well, I thought when I was putting up my pickles I could save some money by buying cheap mustard. But never again! Cheap mustard is no good. It's no strength nor the keeping quality. I've learnt my lesson. I pay to buy the best—KEEN'S D.S.F. MUSTARD."

Made from seed grown in the Fens of England. Shells or hulls are removed and only the lightest seed is used. Superfine grinding ensures the full mustard flavor.

In original tin for a little as 10¢

COLMAN-KEEN (CANADA) LIMITED 1000 Amburst Street, Montreal, P.Q.

## His Majesty's Portrait FREE

Copyright—Bassano

THE makers of Bee Hive Golden Corn Syrup and Durham Corn Starch are happy to offer to their friends throughout Canada a handsome two tone reproduction of His Majesty, King Edward VIII. The portrait (by Bassano) is one of the most recent and has been specifically designed for framing, measuring approximately 9" by 11". It is restrained and dignified and when framed will blend in perfect taste with the furnishings of the finest room. Many well deserved compliments have been received on the beautiful appearance of this portrait.

ST. LAWRENCE STARCH CO. LTD.

### How to Secure Free Portrait

Send in one Bee Hive Golden Corn Syrup label and one Durham Corn Starch label with your name and address written clearly on the back of either label, along with the words—"King's Picture." Mail to the St. Lawrence Starch Co. Limited, Dept. K, Fort Credit, Ontario and your free portrait will be forwarded promptly.

### The Big Nickel

Looms Large On The Collection Plate, And Is As Common As Sin

"One of the hardest things the church has to face is the big silver nickel," Rev. John Lyons, lord bishop of Ontario, said at the unveiling of a tablet in St. James Memorial hall at Joyceville, near Kingston, Ont.

"The big nickel is as widespread and as common as sin itself," he said. "It is often a matter of wonder to me how people manage to collect so many. People contribute adequately without complaint to amusement. Probably if these people fully realized the problems of the church, they would be of greater assistance."

Native Shrubbery

The scarlet fruit of the silver buffalo-berry tree imparts a gay touch to the prairie farms where the tree is used in the surrounding shrubbery. It is a native of the prairie and is found in hills and along streams from the Peninsula mountains in Manitoba to the Bow River in the Rocky Mountains. In the Manitoba hills the tree grows to a height of 18 feet. It is generally arched and very hardy.

Removing Old Arch

The Arch of Triumph, built by Alexander I. to celebrate Napoleon's retreat from Moscow, is to be razed to make way for traffic. The arch, more than 100 years old, stands on Gorky street, near the White Russian Railway Station, point of arrival and departure of tourist trains.

### Horseback Trail

Will Be 2,300 Miles Long, Extending From Canada To Mexico

Plans for a horseback Pacific coast trail, extending from Canada to Mexico, have been announced by the National Park Service.

It will be 2,300 miles in length and will be continuous on all the higher mountain trails on the coast. It also will connect all intervening national parks.

Nearly all of the work is to be done by the CCC and the trail is expected to get it down.

"Sorry, but I don't believe you."

"Why not? Artists have been known to have done such things."

"Yes, but not mads."

Cut flowers last longer in water if the lower leaves are removed from the flower stem, so that they do not decay in the water.

### Little Helps For This Week

That good thing which was committed to thee, keep by thy Ghost which dwelleth in us. 2 Timothy 1:14.

Oh! that the Comforter would come.

Nor visit as a transient guest. But fix in me His constant home. And keep possession of my breast. And make my soul His loved abode.

The temple of indwelling God.

The real progress of your soul in the divine life is a tender plant. It requires stillness, meekness, and the unity of the heart totally given up to the unknown workings of the Spirit of God, which will do all its work in the calm soul that has no hunger or desire but to escape out of the mire of its earthly life into a life with God. It is not wise to yield to an eagerness of many things which although they seem innocent will divide and weaken the workings of the divine life within you.

The French were the first to use airplanes extensively.

### ARROWWOOD ITEMS

Born—On Monday, July 20th, to Mr. and Mrs. Wilbur Brubaker, a son.

Born—On Tuesday, July 21st, to Mr. and Mrs. A. Royer, a son.

We are pleased to report that Mr. R. G. Bell is able to be out of bed after his recent illness.

The Queenstown baseball team went to Strathmore on Wednesday to take part in a baseball tournament.

Mr. Jack Clarke left last Friday for his home at Didsbury, after spending a month with relatives in Arrowwood.

Mr. and Mrs. J. M. Wains and daughter Mary and Grace Board were visitors to Rockyford last Sunday.

Mrs. J. Sims, of Vancouver, is here to spend the summer with her husband at the Buffalo Hill Ranch.

Mr. and Mrs. Joe Burger, who have been visiting with relatives in Arrowwood, returned to their home at Cluny on Monday.

Miss Marjorie Hill, who recently left Vulcan to reside in Calgary, has accepted a position in the Kay Beauty Parlor of that city.—Vulcan Advocate.

Mr. F. F. Dettler arrived here Tuesday evening from La Verne, California, to look after his farm interests and will remain until after harvest.

Mr. T. Robinson left for his home in B.C. after having spent the last three months here superintending the building of the new flume west of Arrowwood.

Mr. L. R. Blair, of Airdrie, is the relieving agent at the local C.P.R. depot. Mr. Blair was at Arrowwood three years ago in the same capacity.

Rev. W. C. Lyle will conduct the service in the United Church Sunday, owing to the absence of Rev. J. N. Wilkinson. The service will commence at 11:45 a.m. so, if you are not there by that time, you'll be late.

Mr. and Mrs. Fred C. Miller daughters left last Friday morning for Banff, where they will spend their holidays camping.

Mr. W. R. Fonger returned last Saturday from Brantford, Ont., where he had been called owing to the illness and death of his father.

Last Thursday evening about sixty young folks motored to the river for a wiener roast. This was given in honor of young people from Jernica, Stettin, Kinderley and the camp leaders. Miss Ida Shockley and Mr. and Mrs. Paul Longnecker, of Yakima, Wash. A few games were played and an enjoyable evening was spent by all.

Mrs. Hall, of Calgary is visiting with Mrs. T. Lloyd.

Mr. and Mrs. N. Nissen and family, of Acme, were Sunday visitors at the home of Mr. and Mrs. T. S. Board.

Mr. Raymond Johnson is remodeling the Lord butcher which he is converting into a pool hall.

Mr. C. G. Taylor, local C.P.R. agent, left Tuesday morning on a short vacation at Antigonish, N.S. He will also visit relatives and friends in Halifax and Sydney, N.S.

For satisfaction in harness and shoe repairing try Clifford Mann, one block east and one block north of the Red and White Store. Farmers, now is the time to get your binder canvases repaired.

Mr. and Mrs. A. M. Simmie and family, of Tyner, Sask., spent a day in Arrowwood with Mr. Simmie's brother Bert last week. They were on their way home from a holiday spent at the Coast.

FOR SALE—Singer sewing machine, in first-class condition. Enquire at Resource Office.

FOR SALE—Granary 12x14, in perfect condition. Apply, Resource Office.

FOR SALE—My entire herd of good dairy cows. E. C. Bowman.

**Apex Limited**, Dyers and Cleaners of Calgary, will call Wednesday of each week at Arrowwood for all kinds of dry cleaning and dyeing. All cleaning left with our agent at the Arrowwood Bakery. We receive our prompt attention. Or, if you wish, the driver to call, just leave your name with the agent. Prices reasonable.

"Steel of Empire," the recently published work by John Murray Gibson, while really the story of the Canadian Pacific Railway, has so much of other Canadian history that it will find a permanent place as one of the outstanding contributions to the records of the Dominion. Starting with the first locomotive on our shores, a Chinaman, Hut Sten, in British Columbia at the end of the fifth century, Mr. Gibson traces the romantic growth of the Canadian Pacific, many centuries later, with a wealth of incident and detail, the author's long association with the railway having been of the utmost value.

Possessing one of the finest collections in the world of colored pictures of scenes in the heart of the Rocky Mountains, E. C. Lonsdale, of Banff, recently exhibited them to the Women's Canadian Club at an illustrated lecture at the Vancouver Hotel. The pictures included scenes of mountains, valleys, lakes and birds, animals and flower life.
